chier shalling J] SO 23 NE MICHAELCHURCH ESCLEY CP 1/30 Barn and cow house about 20 yards north-east of Great Cefyn Farmhouse GV J TT Barn and cow house. C17. Rubble, corrugated iron roof. Two parts consisting of 4 bay barn to west and adjoining cow house with loft to east. Barn: small 2-light oak mullioned window to west bay, ventilator slits in 2 rows, 4 either side of main south entrance, one of 2 sets of opposed ledged full-height double doors in the third bay from the west end. Further entrance in west bay to right of the small 2-light window, with C19 ledged door leading into cot. Cow house part to east has 3 matching entrances under plain tiled hoods each with pegged and chamfered oak door frame, the centre one dated "1677" on its lintol; ledged doors to 2 of the entrances. <u>Interior</u>: Barn with 2 types of A-frame raking strut trusses: one with 2 vertical posts from tie to collar; the other with none. Three sets of purlins to each slope appear to continue with overlaps through east rubble wall into cow house loft. The rubble wall reaches almost up to tie-beam level and contains just above ground level, a blocked opening with oak lintol. In the west bay is a cot occupying half the depth and the whole width of the bay which is partitioned off on north and east sides by light studs and posts. <u>Cow house</u>: loft (not inspected) and stalls and troughs, probably C19. Appears to be an extension of the barn. The calligraphic "1677" incised, slightly off-centre, on the lintol of the central entrance relates closely to a building of similar date at Lower House Farm (qv). RCHM, Vol I refers to the cow house as stables which is strange in view of the lowness of the entrances. - 17 -

MICHAELCHURCH ESCLEY CP SO 33 NW Marsh Farmhouse 2/38 GV II Farmhouse. Probably C17 remodelled in early C20. Dry stone rubble, stone slate and corrugated iron roof, brick gable end chimneys. Former gable entry beside stack; as amended, opposed doors with staircase running between, bread oven and former wash house lean-to attached to north gable end. Two storeys. East front: 2 C20 windows with 2- and 3-light casements, central ledged door under corrugated iron gabled porch. West front: 3 windows with C20 brick dressings. Gable end to north: 2 small blocked windows and 2 blocked windows with labels. Interior: completely remodelled early C20, but original structure with shaped rafter-ends retained; 3 bays: the north truss later braced against north chimney stack. An interesting feature is the staircase from first to former attic floor which is positioned above the north gable entry; it was unfortunately not easy tp establish how one got to the first floor. MICHAELCHURCH ESCLEY CP SO 33 NW Barn and cow house about 2/39 20 yards west of Marsh Farmhouse GV TT Barn and cow house. Probably C17, extended in late C18 or early C19. Dry stone rubble and timber-frame with weatherboards, asbestos roof. Three partly timber-framed bays rebuilt in rubble to front wall, left bay, gables and front catslide extension to left of entrance, cow house under right bay. Opposed entrance doors to middle bay of timber-framed part, ledged door to cow house in right bay. Interior: weatherboarded timber-frame to rear of left bay, to right of rear doors and to left hand end of bay to left of threshing floor which was formerly an external wall. Frame is 2 panels high from high cill to wall-plate; trusses are of raking strut and queen strut type, the last towards gables. - 23 --

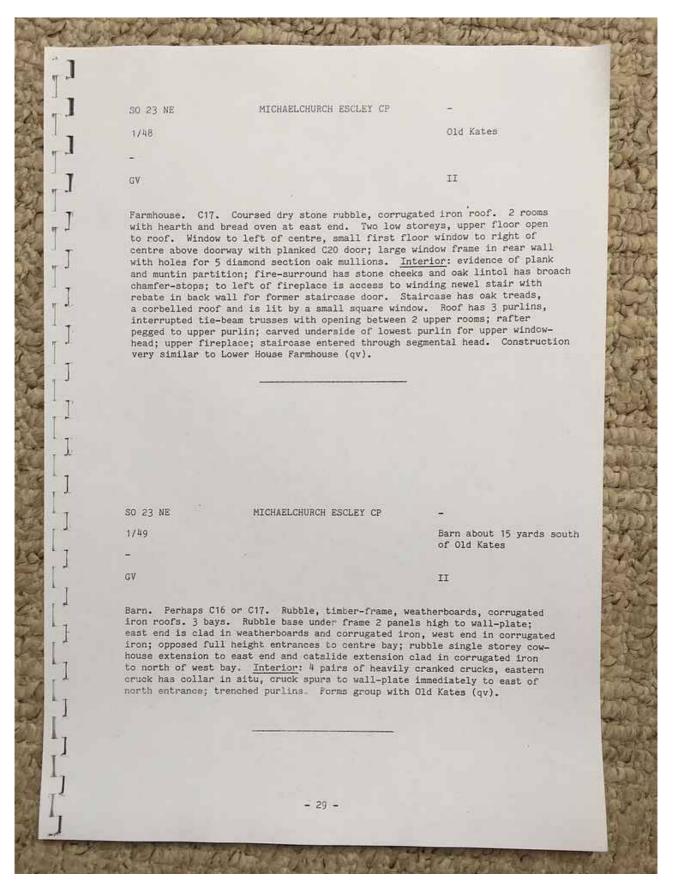

and the state of the MICHAELCHURCH ESCLEY CP SO 33 NW Barn, cow shed, stable 2/41 and attached cart shed about 20 yards south of Oldhay Farmhouse II GV Barn, cow shed, stable and attached cart shed. Probably C18, extended in C19. Rubble, timber-framed, corrugated iron roof. L-plan with extended barn forming one wing, cart shed the other hinging on stable. One storey and attic; 7:3 bays; opposed entrance doors in corrugated iron to third bay from right, 2 ledged doors to cow house left of centre, ledged door to stables on left hand side. Cart shed divided into 3 bays by 2 rubble pillars to entrance front; behind these are 2 more rubble piers demarcating catslide roof area; end wall is rubble. Interior: original 3 bay threshing barn with floor in centre bay, has V-struts and tension braces; right hand bay of smaller scantling, apparently C19, and weatherboarded. Cow shed area of 2 bays has similar trusses to barn part but on rubble walls rather than framing 3 panels high. Corner stable area is not bonded with cow house but was probably added soon after. Forms large agricultural group with nearby Oldhay Farmhouse and cow shelter (qv) which together enclose 2 sides of farmyard. MICHAELCHURCH ESCLEY CP SO 33 NW Cow shelter attached to 2/42 south west end of Oldhay Farmhouse II GV Cow shelter. Probably C18. Rubble, corrugated iron roof. Four bays. Open front supported by 3 posts. Small extension for cot with split log cladding under pent roof to right hand bay. <u>Interior</u>: continuous wooden trough along back wall, inclined away from cot; open rafter trusses with pegged end butt joints at apeces. . 25 -

top at the The The 571. Í MICHAELCHURCH ESCLEY CP SO 23 NE Pike's Farmhouse 1/51 11 G٧ Farmhouse, now store. Probably late C17 - early C18. Coursed drystone rubble, stone slate, corrugated iron and asbestos roofs; centre stack and hipped roof to left part; end stack to right gable. L-plan, local develop-ment of long house type, 4-cell arrangement of the part to the right divided into stair/chimney area, principal room, cross-passage and a further cell which joins and overlaps the left hand subsidiary return wing used for service and animals. Right part: 2-storey one-window front, 3 lights to ground floor and 4 to first floor above (both windows covered up at time of re-survey (1984) but upper one may have diamond section mullions), entrance to left near junction with return wing under corrugated iron canopy by ledged C19 door. Rear elevation has 2-window front: to left is former 5-light diamond section mullioned window now of 3 lights under label; to right is another window to rear of junction of the 2 ranges which had 3 mullions; above the first window, but slightly to the right is a partly blocked mullioned window of the same size retaining one mullion and the apertures for another. Left part: one storey and attic, one casement of 3 lights to right hand side, another small casement of 2 lights to left with ledged C19 door to its right. <u>Interior</u>: right part has plank and muntin screen through which beneath large deeply chamfered beam to left of cross-passage 2 juxtaposed ellipitically headed doorways lead into left cell of main range; principal right hand room has newel staircase to rear side of fireplace and 2 chamfered beams dividing ceiling into 3 parts. Inside of left part of return range is a cowhouse. (Right part of return range not inspected). Forms a surprisingly complete example of a developed longhouse incorporating animals, service area and a bending of the traditional plan. - 31 -

MICHAELCHURCH ESCLEY MICHAELCHURCH ESCLEY OF SO 33 SW Michaelchurch Court, 4/76 steps and terrace walls 29/9/52 to entrance front 110 GV House. C16 and early C17, altered and extended c1866 by G F Bodley for Guy Trafford. Coursed rubble, timber-frame; stone slate roof and rubble stacks. L-plan: main range has combined entrance and garden front facing mast; cross-wing over cellar projects eastwards from south end of main range; porch range projects from and masks the great part of the east front of the main range; one large stack with 2 diagonally-set C20 shafts projects from the rear side of the main range and a similar one from the south side of the cross-wing, end stack to north gable of main range. Two storeys and and attics. Prominent timber-framed 3-gabled porch range on rubble base 6:2 windows to main range, has close-stud and quadrant brace decoration. 3:1 to porch range and 1:4 to cross-wing, mainly mullioned and transomed windows with lead quarries in metal casements, except for porch range which has 2- and 3-light casements on ground and first storey respectively. <u>Cross-wing</u>: ground storey has 5 lights under late C19 segmental hood; first storey, 5 smaller lights; gable, 3 lights. <u>Main range and porch range</u>: blocked entrance now one large light immediately to right of cross-wing, 5-light C19 window, to left of main entrance a 2-light window, to its right two 2-light C19 casements; first floor has 2-light casement above blocked entrance, 2-light window, partly obscured by porch a 2-light canement above discled set of casements to each of the 3 bays of the jettied timber-framed upper portion of the porch range; attic has two 4-light dormers with cambered and embattled timbers beneath gable containing 2 sets of quadrant-braces. Entrance under south bay of early C17 porch which is flanked by 2 layers of plank and muntims. Rear elsvation has random mullioned and transomed fenestration, probably mainly late C19 or early C20 spart from 4 evenly spaced dormers with 3 lights under each gable. Side entrance from north immediately to rear of porch range through framed oak door frame with 3 chamfered mullions in fanlight over nail-studied 6-panelled C17 door. Interior: Porch has elaborate plasterwork consisting of interlacing motifs of grapes and leaves containing the date 1602, the initials MLCEN P, grotesque face above large chamfered door posts and C19 12-panelled mailstudded door. Flagged floors. Principal room to left of entrance has C19 panelling; to right is a C17-style dog-leg staircase probably largely C19 rising part a genuine C17. Two-light window in the rear wall. C17 panelling and fireplace to main front room of cross-wing. To the rear of the crosswing is a plastered wall of posts and rails with remains of decorative floral painting of early C17. Repositioned early C18 door aurround in crosswing at bottom of C19 staircase. First floor has another C17 panelled room with contemporary plaster ceiling in cross-wing, a c1800 Dale cast iron basket grate and 2 conch niches, probably 1930s in the chief room of the main range. To rear 1930s bathroom with original bath, tiling and heated towel rail. Broach stop-chamfered beams to landing at junction of cross-wing and main range with blocked segmental head through timber-framed wall between the 2 parts. Over the porch is close-studded partition; external decorative quadrant braces are visible on the interior. Attic room of main range is 5 roofing bays long: 3 types of truss: open uncollared triangular; queen strut to collar from tie-beam; central post from tie to collar; 3 rous of purlins. Walls and steps to east front are possibly by G F Bodley. - 45 -

L-plan, hall range extending west, cross-wing north; with C18 cider house at a slight angle to west end of hall range; hall originally framed, cross-wing of rubble; stack to west end of hall range with staircase on north side, door on south; and stack to north end of cross-wing with sprial staircase on west side, blocked entrance on east side both stacks with 2 diamond shafts. South front: 2 storeys, with attic to cross-wing at right. Hall range: 4 irregular sized windows, all 4-pane boxed sashes, C17 stack between 2 to right; ground floor: 3-light casement to left, roughly central angled bay window of 1:2:1 glazing bar sashes with hipped slate roof; crosswing: 4-pane boxed sash to attic, 12-pane boxed sash to first floor, C20 ground floor French window. Straight joint between rubble wall and rubble of stack to left end of hall range. C18 cider house of 2 storeys with two 2-light casements under segmental heads to each floor, entrance to right with segmental head. North wall has exposed timber-framing to first floor, 2 square panels high, formerly jettied over ground floor, partially under-built in late C19 brick; lean-to timber structure probably late C16, contain-ing C19 dairy. <u>Interior</u>: 2 rooms of hall range divided by timber-framed partition, room to west probably kitchen originally. First floor divided by stud-and-plank partitions with their own top-plates, independent of ceiling beams, probably reset. Roof trusses have tie-beam and 2 trenched purlins, arranged in 5 bays over hall range (excluding chimney stack). (<u>RCHM</u> 1, p 57, no 15). 2-light casements under segmental heads to each floor, entrance to right 104532 (stable a.j.).
